Abstract

⁹

¹⁰ One or two sentences providing a **basic introduction** to the field, comprehensible to a

¹¹ scientist in any discipline.

¹² Two to three sentences of **more detailed background**, comprehensible to scientists

¹³ in related disciplines.

¹⁴ One sentence clearly stating the **general problem** being addressed by this particular

¹⁵ study.

¹⁶ One sentence summarizing the main result (with the words "**here we show**" or their

¹⁷ equivalent).

¹⁸ Two or three sentences explaining what the **main result** reveals in direct comparison

¹⁹ to what was thought to be the case previously, or how the main result adds to previous

²⁰ knowledge.

²¹ One or two sentences to put the results into a more **general context**.

²² Two or three sentences to provide a **broader perspective**, readily comprehensible to

²³ a scientist in any discipline.

26   Replication of an Experiment from 'The Comparative Value of Survival Processing

Methods

28   We report how we determined our sample size, all data exclusions (if any), all

29 manipulations, and all measures in the study.

Participants

Material

Procedure

Data analysis

34   We used R (Version 3.5.2; R Core Team, 2018) and the R-packages *devtools* (Version

35 2.0.1; Wickham et al., 2018), *papaja* (Version 0.1.0.9842; Aust & Barth, 2018), *readxl*

36 (Version 1.3.1; Wickham & Bryan, 2019), and *usethis* (Version 1.4.0; Wickham & Bryan,

37 2018) for all our analyses.
